CACI
EVER VIGILANT

DARKBLUE INTELLIGENCE SUITE

Host a Darkwebathon

Train your team with live, actionable dark web data

Host a CACI DarkBlue Intelligence Suite Darkwebathon and get free or at-cost dark web training, tailored to your mission. Enable your analysts and investigators with hands-on OSINT techniques as they compete in teams, using real dark web data, to develop the most actionable targeting packages in your area of interest. When training is finished, use these packages to launch official investigations.

WHY DARKBLUE?

Tailored content for your mission
DarkBlue will work with your team to ensure that training and data are relevant to your specific mission, whether that's opioids, human trafficking, or cyber threat intelligence.

Safe and secure investigations
DarkBlue removes images and keeps things strictly textual. Participants can also access the live dark web in DarkPursuit,® a secured, non-attributable virtual machine that includes mental health tools like image blur and AI site scanning.

Fresh leads, on us
Our analysts provide a pool of starting points specific to your area of interest, and tradecraft advisors are standing by to help your team maximize their investigative returns.

Flexible delivery
Choose between virtual training sessions (free of charge) or in-person sessions with our expert tradecraft advisors (at cost). Modify the time-frame to fit your needs.

FOR MORE INFORMATION

Contact info@darkblue.caci.com to learn more about hosting a Darkwebathon with DarkBlue today.

WHAT DO WE NEED FROM YOU?

Participants
A minimum of 18 participants and 1-2 judges who can commit to all or most of a two-day training event is required for each darkwebathon.

Internet service
All participants must have a viable internet connection. Since DarkBlue has a built-in secure, non-attributable live tool, participants can use any inter or intra net. No undercover or unattrib needed.

Location costs (in-person only)
For any in-person training, the host must provide a physical location with sufficient internet and desk space, plus cover travel costs for DarkBlue staff.

Designated POC
DarkBlue requires a designated point of contact from your agency who can assist with administrative tasks and communications.

ABOUT CACI'S DARKBLUE INTELLIGENCE SUITE
CACI's DarkBlue Intelligence Suite is the established leader in dark web exploitation. Our mission-focused technology, analyst-led training, and tailored services empower clients to operate within hidden portions of the information environment effectively. DarkBlue provides national security, intelligence, and law enforcement communities with safe, persistent, and holistic access to identify, target, and track dark web threat actors globally.
